CMS Solutions to Offer Incendonet's SpeechBridge Speech Recognition Solutions

Agreement empowers CMS customers to add powerful speech-driven applications in a plug and play manner to Unified Communications Solutions

Chesterfield, MO, March 30, 2010 — CMS Solutions, a division of CMS Communications, Inc. announced today an agreement with Incendonet, Inc. to distribute the SpeechBridge family of speech-recognition solutions. CMS customers who have previously implemented IP based Unified Communications solutions can now add speech recognition-based solutions in a plug and play manner to improve customer service, reduce operating costs and increase mobile worker productivity with Incendonet's SpeechBridge®. SpeechBridge is the perfect enhancement to today's Unified Communications solutions, providing an automated speech-attendant, a speech directory, and mobile phone access to important emails and calendar events with simple spoken commands. With these core applications, customers will begin realizing a return on their investment from day one.

"With SpeechBridge's suite of integrated end user applications, our customer's can significantly enhance the capabilities of their Unified Communications solutions", said Glenn Cosman, Principal at CMS Communications. "These powerful speech-driven applications help our customers better compete in today's competitive business environment with advanced communications solutions."

"We are excited to collaborate with CMS to bring our SpeechBridge solutions to market as an enhancement to today's IP based communications solutions" said Tim Kruse, VP of sales and business development at Incendonet. "Now businesses of all sizes can benefit from the latest speech recognition technologies previously reserved for only the largest enterprises."
